# HOW WE WORK

---

*Your wedding is the first day of the rest of your lives together.  
Let's capture it the way you want.*

Tell me your love story and your vision for your wedding day and I'll tell it back to you through photos and films. At times you'll see me doing a lot of talking and directing, at others you won't even know I'm there. I'll be there to capture your natural, beautiful moments and then leave you alone so that you can enjoy your wedding day.

*We'll laugh together, we'll dance together, we'll drink together, and we might even cry together.*

From phone calls and meetings to customized questionnaires, my goal is to get to know you both so I can document what's important to you, along with the little intimate moments you won't see. These moments matter, because you and your loved ones matter.

*Trust in me because I put 1000% into what I do.*

I promise to be honest and always look for opportunities to capture you in the best light. I will be there to bustle your dress and straighten the groom's suit. I will tell you when the hour package you're interested in might or might not work for the vision and coverage you have in mind. I will always listen to your needs and desires so that I can be the best photographer for you.
